Experience

04.2017- **Developer**, Cariad SE/Audi AG, Ingolstadt, Germany.

now Designed and implemented an embedded ML-based intrusion detection system (IDS) prototype in C/C++ for detecting anomalies in POSIX systems and automotive networked communication (Ethernet, CAN). Performed data analysis of automotive networks, Linux audit files, security risk analysis in Python/Pandas. Generated machine learning models for anomaly detection with Tensorflow/Scikit-Learn/Numpy. Is an integral developer in an agile team (SCRUM) to design and implement the series automotive software of IDS. Pushing continuous fuzzing and security testing inside Cariad as technical expert. Working on research projects like ML-based fuzzing, adversarial attacks on Lidar, or embedded post quantum cryptography. Was involved in several penetrationtest activities and held workshops (e.g. secure coding, fuzzing, ML in security), gave talks, and participated in panel discussions.

09.2010- **Researcher at the Department of Hardware/Software Co-Design**, *Friedrich-Alexander-Universität* 04.2017 *Erlangen-Nürnberg (FAU)*, Erlangen, Germany.

Conducted research on optimization, real-time/embedded systems, security, software (Java, Python, C) and hardware (VHDL, SystemVerilog) development. Collaborated in a transregional research center with 60 international researchers on future many-core architectures. (Co)authored various peer-reviewed research papers at international conferences, leading journals, and a book. Acted as a reviewer and member of a program committee for several conferences and journals. Presented his work in front of leading researchers and the broad public in conferences, workshops, and exhibitions. Supervised students' theses and was involved in teaching.

09.2009- Internship: Embedded Linux and Waver Testing, Infineon Technologies AG, Regensburg, Germany.

01.2010 Developed an embedded Linux solution for intrinisc data monotoring of wafer testing machines. Included a C program for real-time logging and filtering of raw machine data, as well as well as web interface.

2003-2004 Civil Service (Zivildienst), Kreiskrankenhaus Kelheim, Kelheim, Germany.

Education

2010-2017 **PhD (Dr.-Ing.)** in Computer Science at the Department of Hardware/Software Co-Design, Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU), Erlangen, Germany.

Thesis Application Mapping Methodologies for Invasive NoC-Based Architectures (Grade 1.1)

2004-2010 **Diploma (Dipl.-Ing.) in Information and Communication Technology**, *Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU)*, Erlangen, Germany.

GPA 1.3 (very good)

Thesis Decentralized Embedding of Communication Topologies onto Networks-on-Chip (Grade 1.0)

1994-2003 **Gymnasium**, *Donau Gymnasium Kelheim*, Kelheim, Germany.

GPA 2.0 (good)

Software Skills

Lang/Tech O Python, C/C++, Java, Go, Rust, VHDL, SystemVerilog, Github Actions, Gitlab CI, Docker

Soft Skills

Inter-cultural communication, Gender communication, Scientific writing, Self and time management, Agile teamwork

Languages

German (native), English (full professional proficiency), Portuguese (limited working proficiency)

Interests and Hobbies

Traveling, Programming, Climbing, Music (playing guitar/bass, concerts), Reading, Art, Cooking

Links

Google Scholar, Blog, Github, Linkedin,
